

For modern managers,
KUBIK is like a good investment.
To mention just two
of its serious advantages:
first, it's **dynamic** modern look;
second, the advanced ergonomics
and intuitive adjustments system.
Rational decisions lead to
considerable profits: effortless,
professional presentation
and a chair ideally suited
to your form.

fast decisions
and right choices
are the key elements
of **success**

adjustable headrest
for maximum head comfort
at work and leisure

three level adjustable arms
to meet all your requirements

maximum comfort:
anatomically profiled
bucket seat and adjustable
lumbar support

the fourth law of **dynamics**

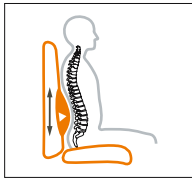

Specially profiled **headrest** ensures steady and comfortable head support.

Ergonomically profiled back gives superb support to the entire length of the back.

Arms adjustable at 3 levels (3D)

– adjustable height and rotation of arm pads, as well as the distance of arm pad from back guarantee comfortable support for wrists, elbows and arms.

Schukra® system with two level adjustability for ideal shape of lumbar support to ensure work comfort.

Plywood frame covered with high-density polyurethane foam to guarantee high resistance to deformation and ensure sitting comfort.

Gas lift allows for smooth seat height adjustability and additional shock absorption when sitting down.

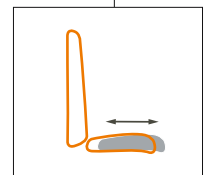

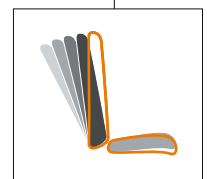

Large diameter 65 mm castors make the chair move smoothly on any surface. Automatic brakes keep the chair in position when the sitter rises. Choice of castors for soft or hard surfaces.

Five-star polished aluminium base with wide arms for maximum stability.

Synchronised mechanism to ensure smooth movement and a wide range of adjustment options to the user's weight and height; easy manipulation owing to two handles fitted on both sides of the seat, within easy reach.

Functionality of the mechanism:

1. **Synchronised back and seat tilt** – 9 degrees seat and 21 degrees back tilt.
2. **Back block** in 5 possible positions.
3. Adjustable **seat depth** in 7 possible positions.
4. Precise, **smooth adjustability of tilting** with easy-to-use, ergonomically shaped handle on the right side of the seat.
5. **Anti-shock mechanism** to prevent sudden impact of the seat against the back once the mechanism is released.
